

ENTERERS AERO RACE

Transatlantic and 'Round-the-World' Races

World Contests Arouse International Interest.

Not since the first demonstration of the practicability of flight in a heavy, man-carrying machine has there been so much interest in aviation as at the present time when two notable races are being planned.

The first of these is the transatlantic race, which will be held in the near future. It is the first aviator crossing the Atlantic Ocean, and the Pan-American Exposition, in co-operation with the Aero Club of America, is considering the practicability of increasing the prize for a "round-the-world" race to \$100,000.

The transatlantic flight is regarded as the most likely of accomplishment. By the route that has often been suggested, via Newfoundland, it is estimated that there is one jump of 60 miles from Belle Isle, off Newfoundland, to Cape Sable, in Nova Scotia, and another of 60 miles from Cape Farewell to Reykjavik, Iceland.

Roland Garros in an ordinary monoplane crossed the Mediterranean from France to Austria, covering 60 miles in eight hours on a non-stop flight, and, in specially constructed machine, made the little question that the Aero Club believed there is little to prevent the transatlantic flight from being made even in an ordinary machine.

Five Compete.

Three giant flying boats are being constructed in Europe to compete for the prize, and two are known to be under way in this country. Glenn Curtiss is to build one for Rodman Wanamaker, who proposes to carry a passenger. Secrecy surrounds the building of the second flyer, but Charles F. Niles is supposed to be identified with it.

The European boats will be brought to this side by Roland Garros, Marc Souper, and John D. Moynihan, three of the world's greatest aviators. Garros' Mediterranean flight was the first of many daring feats he has accomplished.

Moulin's gained his reputation as an aviator of the first rank by flying from Paris to St. Petersburg and back in twenty days. His feat in crossing the Baltic Sea, from Stockholm to Copenhagen, on which he will trust himself above the Atlantic in a dash for the prize.

In his communication to the Aero Club, Garros says he has become familiar with flying by night by the use of a special light, and that he has no fear of losing his course above the Atlantic.

Influence of Wind.

Consideration is being given to the statement of Prof. Humphreys, of the Weather Bureau, that at an elevation of 10,000 feet there is an almost constant wind of fifty miles an hour from the west, but it is unlikely to alter the present plans to make the flight in the open air.

On account of the Wright patent dilemma, it is probable that the United States Government will give special allowances for wind drift, and has no fear of losing his course above the Atlantic.

Officials of the Panama-Pacific Exposition, who have already announced prizes of \$150,000 for the "round-the-world" flight in any form of aircraft, said there is prospect of the prize being increased to \$100,000.

The projected increase found its source in a communication from the Aero Club of America, which stipulated that the prize should be extended to ninety days. If this can be done, the Aero Club men are sanguine of the competition for the prize, and clubs the world over can be obtained that the raising of the \$100,000 prize.

The eventual success of the "round-the-world" race will depend on just such "extension" of the prize as Moore, president of the exposition.

The start and finish, however, must be made in New York, and the "round-the-world" race is scheduled for May, 1915, prior to the time the exposition opens.

Arnold Kruckman, for several years secretary of the Aeronautical Society of New York, to whom the work of organizing the race has been delegated, will make a trip around the world to arrange for the flight. The route will be across the American continent, across the Atlantic Ocean, England, France, Germany, Russia, Japan and the Pacific Ocean.

That there will be many American entrants is already assured. The first definite announcement came from Lieut. J. H. Towers, one of the most daring aviators, who, after determining that he is subject to the approval of the secretary of the Navy, is probable that the permit will be given for forthcoming for Lieutenant Towers, but for one or more others.

Although the Zeppelin dirigible balloons are rarely permitted to leave Germany, it is fairly certain one or more of these huge craft will be entered in the race.

France will unquestionably send some of its splendid dirigibles. There is every reason to believe that the powers will send official representatives.

The principal craft and there will come from Germany, Austria, Belgium, Holland, Spain, Italy, France, England, Russia, India, Japan, Sweden, Norway and Switzerland.

Under the rules of the Federation Aeronautique Internationale certain points must be designated as control points and the places of departure and arrival must be designated as control points and the places of departure and arrival must be designated as control points.

Naturally cities which contribute to the auxiliary fund or which are indicated by individuals or organizations that contribute will receive preference when the control points are chosen.

Hatrack Was Too Small.

Guest Shoots His Host

NEW YORK, Feb. 8.—There were thirty guests at Mrs. Josephine Rosen's Saturday night dinner in her flat at 232 East Twenty-third street, and only nine were seated at the table. The rest were standing around the hall.

When the guests were leaving early yesterday morning they found their hostess in a state of collapse. She was found on the floor, apparently unconscious, and was taken to the hospital.

Some one fired four revolver shots. Mrs. Rosen was badly wounded and taken to the hospital.

Robbed While Praying.

NEW YORK, Feb. 8.—James Morton, seventy-two, the city's oldest pickpocket, was arrested after he grabbed the purse of Mrs. Anna Logan as she knelt in prayer in St. Francis Xavier Church.

Alexandria, Anacostia, and Hyattsville

ALEXANDRIA.

Experts on Sunday school efficiency arrived in Alexandria today for a series of meetings. Tonight the party will leave for Staunton, Va., to attend the annual conference of the Sunday school association of the Virginia association.

In the party are the Rev. Frank McElfresh, of Chicago; the Rev. A. L. Phillips, D. D., of Richmond, and Thomas D. Duggan, secretary of the Virginia association.

The First Baptist Church there was an informal meeting at 2:30 o'clock, and at 3 o'clock a conference of Sunday school workers. At 8 o'clock there will be a public mass meeting in the First Baptist Church. Mr. Duggan, chairman of the local committee, will preside. Dr. McElfresh will speak on "The Modern Sunday School, Growing in Efficiency." Mr. Duggan on "The Virginia Sunday School Association As a Promoter of Sunday School Efficiency," and Dr. Phillips on "Co-operation."

In the corporation court today, Samuel O. Brent, corporation attorney, asked that the liquor license of George S. Finch, at Royal and Princess streets, be revoked, on the ground that Finch was an improper person to conduct a saloon. The court granted the application, and that his place of business had been used to store stolen goods.

The American Indian Guards are arranging to give a fair in March.

In police court this morning, William Stinson, charged with an assault on John Ball, was fined \$10. William Stinson, charged with an assault on John Ball, was fined \$10.

O'Kane Council, 43, elected their officers Sunday: John D. Normoyle, president; William Desmond, vice president; J. P. Quinn, secretary; J. McFarland, collector; Robert L. Wenzel, treasurer; M. C. Green, marshal; James Roche, chaplain; Rev. L. P. Kelly, chaplain; S. A. Brown, M. Igoe and John E. Eberhardt, trustees.

Fire, supposedly of incendiary origin, damaged an unoccupied store and dwelling at 1913 Duke street, Sunday.

Capt. W. L. Martin, of Alexandria, has been elected lieutenant colonel of the Department of Virginia, Capital Police, by the Legislature.

Chemical Engine Company No. 2 was called to R and Twenty-eighth streets yesterday for a fire in the woods.

E. H. Jackson, who was the driver of the prisoners' van for a long time, has been sent to the Eleventh precinct to serve as a patrol driver. He is taking the place of A. G. Bailey, who has been sent to drive the prisoners' van. R. L. Stokes, who was an extra driver in the Police Department, has been sent to drive the prisoners' van.

William H. Bell, at his residence, 333 Rhode Island avenue northwest, yesterday, at 10 o'clock.
